

1) `Int *p[10];` means an array of int pointers

`Int (*p)[10];` means pointer to an array of size 10

2) `Int (*p)(char (*a)[]);` p is a function pointer that returns int. takes pointer to an array as parameter.

`Int *p(char (*a)[]);` p is a function that returns int. takes pointer to an array as parameter.

```
C:\Users\Junyu Teoh\Documents\CSCD240\Lab5>a.exe
Name = Alfred Morino
SSN = 496-50-2260
Age = 50
Height(cm) = 170.5
Weight(kg) = 70.5
Name = Alfred Morino
SSN = 496-50-2260
Age = 50
Height(cm) = 170.5
Weight(kg) = 70.5
